PROFILE SUMMARY

Aspiring computing professional with a strong foundation in cybersecurity, machine learning, and system design. Currently pursuing a Bachelor's of Computing at Belgium Campus. Passionate about bridging the gap between research and real-world application, with hands-on experience in embedded systems and open-source server administration

EDUCATION

2023-2026
BELGIUM CAMPUS ITVERSITY
• Bachelor of Computing
• Focus: Machine Learning, Research Design, System and software engineering

COMMUNICATION

Strong communicator with the ability to collaborate effectively with colleagues and stakeholders from diverse backgrounds. Bilingual in Afrikaans and English, with a proven ability to adapt to and thrive in multicultural environments. Skilled at building positive relationships and working as part of a team to achieve common goals.

SKILLS

- Programming & Scripting: C#, C++, CSS, HTML, Java script, Python
- Systems Administration: Linux (Debian, Arch, Ubuntu), SSH, file management, system configuration
- Server Management: Hosting and managing game servers, web sites and remote management

WORK EXPERIENCE

Genesis Reproductive Centre 2024/11/16 TO 2025/1/22
General Contractor

Installed and configured a biometric attendance system that enables management to automatically generate detailed Excel reports from fingerprint scanner data. The system tracks employee attendance, calculates total working hours, overtime, absences, and identifies weekend workdays for accurate payroll and performance monitoring.

LANGUAGES

- Fluent: Afrikaans
- Fluent: English
